

HES 659 PASTURE  
ANNUAL OPERATING PLAN

This is the annual operating plan for the 2004 grazing season for the HES 659 pasture and will be considered part of the terms and conditions of the grazing permit.

**I. Permitted / Authorized Use**

|                            |         |          |       |                       |         |          |       |
|----------------------------|---------|----------|-------|-----------------------|---------|----------|-------|
| Karl Tyler Chevrolet INC.  |         |          |       |                       |         |          |       |
| <b>Term Grazing Permit</b> |         |          |       | <b>Authorized use</b> |         |          |       |
| No.                        | On Date | Off Date | H.M.s | No.                   | On Date | Off Date | H.M.s |
| 40                         | 7/1     | 9/31     | NTE 7 | 40                    | 7/1     | 9/31     | NTE 7 |

**II. Grazing Schedule and Monitoring Utilization Standards**

| <b>Actual Grazing Schedule</b> |           |        |          | <b>Allowable Standards</b> |         |
|--------------------------------|-----------|--------|----------|----------------------------|---------|
| Unit No.                       | Unit Name | # head | Dates    | Riparian                   | Uplands |
| 1                              | HES 659   | 40     | 7/1-9/31 | 45%                        | 50%     |

HES 659 is comprised of approximately 320 acres of private land and 16 acres of USFS land that are fenced in common. The 16 acres of federal land contain both upland and riparian areas in mid seral condition.

**\*\* - It is the permittee's responsibility to insure cattle are moved before utilization levels are exceeded.**

**III. PERMITTEE MANAGEMENT RESPONSIBILITIES**

**WHERE A STATE CLOSURE ORDER EXISTS** - Any hay or straw used in association with this permit, will be certified and tagged as noxious weed, or noxious weed seed free as directed by the order.

To meet the State of Idaho's provision for trichomoniasis testing, all bulls must be tested at least 45 days prior to the turnout date.

Cattle that die from a contagious disease, or that die at a location where they may contaminate water or become a public nuisance, must be properly disposed of.

At the end of the grazing season, please mail in the actual use booklet that you have received.

**IV. IMPROVEMENT MAINTENANCE/CONSTRUCTION**

Forest Service is responsible for maintaining the triangle shaped jack fence on the property.

## V. ACTION SUMMARY

***Watch for weeds***, knapweed or leafy spurge, along the highway right-of-way. Please let us know if you see any new infestations or any new species we may not know about. Especially along and in the snow plowing areas along highway 28.

I have reviewed and accepted this Annual Operating Plan for the 2004 grazing season. Any changes to this Annual Operating Plan must be approved by the District Ranger.

| Permittee                             | Date         |
|---------------------------------------|--------------|
|                                       |              |
|                                       |              |
| Forest Officer /S/ Dennis M. Hilliard | Date 4/30/04 |
|                                       |              |
